A Note on Colors: There are many factors that may affect the color on your printed product. The colors above are a CMYK representation of spot colors and your printed product will not match the samples above exactly. Refer to a PMS book for a better representation of a color but also note that the color of the paper, whether it is coated or uncoated, and whether it is thermographed or flat will affect the color. Reorders may not be an exact match to a previous job. We will do our best to consistently provide a quality product but slight variations may occur.
